

Bihash Arulampalam

Undergraduate . Junior Developer . Tester

Being a Final-year undergraduate with Eight months of industry experience, I've gained proficiency in problem-solving, time management, and analytics. My leadership tenure at over four years has sharpened my skills in software engineering and web development, reflecting my commitment to excellence and organizational value.

Experience

QA Automation Engineer Intern · **PickMe** Feb — Sep 2023

- Automated mobile app testing using Appium, and tests using Selenium with Java.
- Conducted API testing using Postman and automated API tests using RestAssured with Java and JMeter.
- Reviewed requirements, created test cases, and conducted test execution.
- Managed test execution, defect reporting, and improvements tracking in JIRA.
- Identified and reported defects, conducted retesting and regression testing.
- Utilized database queries for data verification and Verified data integrity using SQL queries in various databases.
- Actively participated in API Testing and Functional and UI Testing.
- Focused on ensuring the robustness and quality of the mobile application system.
- Used technologies:** Java . Selenium WebDriver . Appium . TestNG . Maven . Postman . Jenkins . Git . MySQL . Jira . Node.js . REST Assured . REST APIs .

Education

BSc (Hons) in Information Technology · **SLIIT UNI** 2020 — 2024

- Currently reading BSc(Hons) in Information Technology Specializing in Information Technology
- During my studies, I developed strong leadership and teamwork skills in diverse deadline-oriented environments, fostering effective communication, and cultivating strong interpersonal, organizational, and time management abilities.
- Degree Completion: December 2024

Selected Projects

VEHICLE PASS SYSTEM (MERN Stack Web Application) · **VehiPass Pro**

- Developed an individual project for a Sri Lankan customer vehicle registration application, using the MERN Stack. built both frontend and backend, employing MongoDB, React JS, Express JS, and Node JS to manage CRUD operations. Additionally, I am utilizing REST API for this project.
- Applied technologies:** Mongo DB . Express JS . React JS . Node JS . REST APIs

ELECTROGRID SYSTEM (Rich Client Web Application) · **e-Grid**

- Developed a system that monitors the power consumption of users, automatically generates monthly bills, sends them to users, and accepts online payments. Our task was to develop a highly scalable online platform for EG to cater to all users.
- Applied technologies:** Java . Jersey . JavaFX . Apache Maven . JAX-RS . MySQL . HTML . CSS . Bootstrap . jQuery . Ajax . RESTful Web services

PRINTING PRESS SYSTEM (Servlets Web Application) · **Veena printers**

- Developed a Java-based web application using Servlets and the MVC pattern, integrated with SQL Workbench, to streamline and digitize manual printing press operations. The system efficiently manages customer details, assets, and delivery management, providing a user-friendly solution for New Veena Printers.
- Applied technologies:** Java . Servlets . MVC . HTML . CSS . JS . MySQL

Skills

Programming Languages

Java . Python . JavaScript . Kotlin . Dart . SQL

Front-End

HTML . CSS . JS . Bootstrap . React JS . Flutter . jQuery . Ajax . Sass . Tailwind CSS

Back-End

Spring . Java Servlet . Node JS . express JS . Django . Flask . JDBC API . REST API . Restful Web Services

Database

MySQL . Mongo DB . ORDB . PL/SQL . SQLite

Automation

Selenium . Appium . Cypress . JUnit . TestNG . JMeter . Postman . RestAssured . API Testing . Jenkins . Ansible

Virtualization

Docker . VMware fusion . Oracle Virtual box

Cloud Platform

AWS . Microsoft Azure . GCP

Version Control

Git . GitHub . GitLab

Project Management

Agile . Scrum . Kanban . Azure Boards . Trello . Jira

Operating Systems

Windows . macOS . Ubuntu . Fedora . CentOS . UNIX (server OS)

Certifications

Introduction to Automation

Coursera Certification | 2023

Python Automation Project

Great Learning Certification | 2024
